

# TLC for tiny tummies:

Give their digestive system a good start

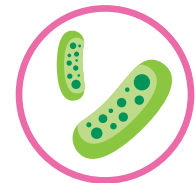

## It's normal for babies to cry.

However, if your baby cries for at least **3** hours a day, **3** or more days a week, for **3** or more weeks, it could be colic.

## Studies suggest colic could be due to an imbalance of "good" bacteria in baby's gut.

An immature digestive system could also be a potential cause of colic. Or, it may be caused by a food allergy.

## Infants' Mylicon<sup>®</sup> Daily Probiotic Drops have been clinically shown to reduce excessive crying and fussiness associated with colic\*†

- Helps balance the beneficial bacteria in baby's gut and supports immune function\*
- Includes one of the most researched probiotic strains in the world†
- Contains no herbal supplements, wheat, gluten, soybeans, dairy, fish/shellfish, or peanuts/tree nuts
- Non-GMO. Product does not contain simethicone

## Using Infants' Mylicon<sup>®</sup> Daily Probiotic Drops

- Just 6 drops daily
- Add to a bottle with breast milk or formula, apply directly on the breast, or dispense with a spoon
- No refrigeration required

See full directions on product package.

If your child was born prematurely or has immune problems, consult your doctor prior to use.
